PROJECTS

Maveric-IS Dev Team

Sept 2023 - present

IS-DEV Team

Collaborated with the IS team on building their travel application using Spring Boot with MySQL. Essentially, this application facilitates booking tickets for Maveric employees to travel globally and visit different Maveric locations.

Maveric- Engineer Excellence Portal

June 2023 - Sept 2023

Develop API and Fix Issues and bugs.

Engineer Excellence Portal is a web application for the Maveric project management for allocating and maintaining the projects and employer project details. With add on having Think NXT employee details and their assessment portal.

BUDDI.AI-CODING.AI (Web Application)

Aug 2021 - Feb2023

Develop API and Fix Issues and bugs.

CODING.AI is a web application which helps medical coders to code and audit medical records. Also, this helps to find the accuracy and deviation of the codes and generate various reports in reporting module.

BUDDI.AI-CODINGAI Interface Application (Java and

Feb 2021 - Feb 2023

Server Side)

Develop and Deploy the Applications

CODINGAI Interface Application (IMPORT & EXPORT) is server-side application which Import the medical records from client server and loaded those records in CODING.AI web application and export the same audited medical record to client server. For some period, I've been solely responsible for managing this application.

ROLES AND RESPONSIBILITIES

Roles

- Implemented new feature requests, enhancing the overall functionality and user experience of the project.
- Successfully managed an entire project independently, overseeing all aspects from initiation to completion.
- Led and mentored a team of interns, imparting essential project knowledge to ensure seamless collaboration.
- Conducted thorough testing of APIs developed for reports and code emission using tools such as Postman, ensuring robust and error-free functionality.
- Worked on client tickets, addressing issues promptly and ensuring client satisfaction with the delivered solutions.
- Proficient in database management with hands-on experience in designing, implementing, and maintaining databases.

ACHIEVEMENTS

Buddi.AI Achievements

- Worked on onboarding clients' requirement to load 40k files within 2 minutes, which initially took 30 minutes. I optimized various logic, indexed the queries, and implemented multithreading, successfully reducing the loading time to 1 minute and 50 seconds.
- Worked on the onboarding facility for our highest revenue-producing client, assumed additional responsibilities, and dedicated flexible hours to finalize the facility. Ultimately, our work received client approval, leading to an approximately 8% increase in revenue from that client.

EDUCATION

PSNA college of Engineering and Technology

June 2016 - May 2020

B Tech Information Technology
